

# IOKA Oxygen Cleaner

IOKA Oxygen Cleaner is a high powered, Oxygen bleach mould remover. Easy, safe removal of mould and environmental pollution on all exterior timber, decks and outdoor furniture.

Sodium Percarbonate combined with selected natural surfactants creates a powerful oxygen cleaner which is safe for the environment. All it takes is a little elbow grease, a scrubbing brush and a hose off.

Great value – 1kg concentrate will treat approx 50sqm. Harnessing the power of concentrated oxygen, timber comes back like new.

## PREPARATION

Try and pick a time of day when you can apply Natural Timber Oxygen Cleaner when the timber is not in direct, hot sunshine.

## APPLICATION

Mix to a solution with warm water as per instructions on label. Stir well prior and during – spray apply with a regular garden sprayer. Wait ten minutes, remove the mould with a scrubbing brush or deck broom, then hose clean. Particularly stubborn mould may require two applications.

## COVERAGE

Dressed Hardwoods 50-60 sqm/kg

Dressed Softwoods 30-40 sqm/kg

A band or rough sawn finish will absorb approximately 25% more than the above indicatives.

## MAINTENANCE

Apply annually in the Spring, or as needed. Cleaning of implements : Immediately after use clean equipment with warm water and detergent.

## SAFETY INSTRUCTIONS

Wear rubber gloves. Do not pour residue into the sewer (refer to back of product label).
